Forecast for Tuesday 10 Jan 2023

Weather: Dry overnight and at first on Tuesday. Rain preceded by a short period of snow above 400m will extend northwards to all ranges during the morning. Rain will be heavy for a time over western mountains such as Knoydart, Skye and Torridon, giving way to clearer conditions and blustery showers by early evening. Showers will turn increasingly wintry above 500m.

Chance of cloud-free hill tops above 800m: 40% at first and again during evening, otherwise little chance.

Low cloud and visibility: Good visibility at first becoming poor as rain sets in and very poor in snow. Canopy of cloud above many of the tops at first, lowering to 600 to 700m, most extensive in south and west of area. Clouds lifting and breaking up later in afternoon with good visibility developing away from showers.

Met Office Aberdeen Meteorologist's View
Very difficult conditions developing, especially over higher ridges and summits, combination of strong winds, low temperatures and driving rain and sleet.

Forecast for Wednesday 11 Jan 2023

Weather: Bright interludes and further sleet and snow showers with rain at lower levels. The showers will be most frequent and heavy at times in west of area. Fewer showers and more sunshine over Caithness hills and towards Ben Wyvis.

Maximum wind: Strong southwest winds with average speeds 30 to 40mph on the tops and gusts 55mph, easing a little in the afternoon.

Chance of cloud-free hill tops above 800m: 50%, best in east of area.

Low cloud and visibility: Good visibility between showers with occasional clouds about 600 to 700m. Interuptions to very poor visibility as wintry showers come along with more extensive cloud cover.

Temperature: **Glens:** Plus 3 Celsius rising to 7 Celsius.
At 800m: Minus 1 Celsius
Freezing level: 700m
